## SPIES HECKER'S NEW HS EXPRESS FILLER 5250 THE HIGH SPEED SOLUTION

February 2008 saw the national launch of Spies Hecker's Permasolid® HS Express Surfacer 5250, a product developed specifically to afford refinishers much faster drying times when executing speed repairs.

With its rapid flash-off and exceptional drying capabilities, this Filler undoubtedly accelerates the refinishing process. What sets the Permasolid® HS Express Surfacer 5250 apart is that; not only does it display excellent hardness properties; it also has good absorption of overspray, great top coat flow and high vertical stability. Exceptionally easy to apply, after rapid drying at 20°C, this Filler can be sanded after just one hour.

Optimum pre-treatment of the substrate is always critical to a positive refinish outcome and, the quality of every job is dependant on the refinisher's selection of the right surfacer. Spies Hecker has tailor-made solutions to meet every need.

**Tailor-made Solutions for all your Surfacer Needs**

By being able to select precisely the right products, our customers optimise their refinishing processes. Spies Hecker's comprehensive surfacer range provides user-oriented solutions for a broad

Spies Hecker's New Permasolid HS Express Surfacer 5250 is the ideal solution for high-speed repair bodyshops.

spectrum of applications in the body shop - from high-speed repairs to those that require fillers with a longer pot life.

The brand's focus is as much on the workshop's productivity as on the quality of the final product and all Spies Hecker surfacers feature optimum adhesion, isolating properties and excellent paint

flow.

All can be mixed with medium solids and high solids hardeners and thanks to their flexible application, refinishers are assured of speed and precision.
